## About

Hi! I am self-taught a Web Developer, Software Developer and an open-source contributor who loves getting involved in developer communities. With a great passion for technology and web development. Likes to work with Python and Java tech stack. Can work well in teams and finds clear communication important.

## Experience

### CoolAsCode

Founder

**2022 - Present**

As the founder of CoolAsCode, I am deeply passionate about helping businesses grow and thrive in the digital landscape. With years of experience in the industry, I bring a wealth of knowledge and expertise in website development and video editing to the table. I am dedicated to providing exceptional service and working closely with our clients to understand their unique needs and goals.

### GDSC MUJ

Member

**2021 - 2022**

As a Member, I work with the GDSC MUJ Team to help students learn about competitive programming and other technologies.

 [GDSC MUJ](#)

### FreeLancer

Web Developer, AI/ML

**2019 - Present**

### PearlThoughts

AI Engineer Intern

Remote

**April 2025 - May 2025**

- Developed an AI-powered **patient wait time prediction system** using synthetic healthcare data.
- Built and deployed a **Streamlit web app** that predicts wait times based on appointment and patient parameters.
- Applied **machine learning techniques** (Random Forest Regressor) for time prediction and performance evaluation (MAE).
- Generated realistic synthetic datasets for testing and training using NumPy and Pandas.
- Prepared the solution for **cloud deployment on Azure ML**, enabling scalable inference in production.

## Education

### Kendriya Vidyalaya No-1, Balasore

School - Higher Secondary Schooling

**2011 - 2021**

### Manipal University, Jaipur

8.65

Bachelor of Computer Applications (BCA)

**2021 - 2024**

### Manipal University, Jaipur

Master of Computer Applications (MCA)

**2025 - 2027**

## Skills

---

## Projects

---

### Python -Messenger

A secure messaging application built with python.

This messenger is built to enable the clients to exchange text messages. The clients connect to a server (hosted on cloud) and they will be able to securely exchange messages with each other through the server.

### Accident Prevention using OpenCV

There are a lot of accidents taking place every day due to mishaps. As the population grows the no. of cars and accidents is directly proportional. This example program shows how to find frontal human faces in an image and estimate their pose. The pose takes the form of 68 landmarks. These are points on the face such as the corners of the mouth, along the eyebrows, on the eyes, and so forth.

### Scaler Open Source September

Participant

**1st Sept 2022- 30th Sept 2022**

Gained experience in Git, Github and Open-source contribution.

Contributed for 30 consecutive days.

[🔗 Open Source September](#)

### Hacktoberfest 2022

Participant

**01 Oct 2022 - 31 Oct 2022**

Gained experience in Open-source contribution.

Contributed for 30 consecutive days.
